

WHEN TO DO IT	WHAT TO DO
Start Up	<ul style="list-style-type: none"> • Fill new tub with source water (we recommend a carbon Pre-Filter on your garden hose). • Adjust Alkalinity and Hardness to ideal levels. • Bring water to temperature of 100 Degrees F. • Add one teaspoon of granular chlorine and operate with jets on and cover off for 20 minutes. • Firmly shake one 480ml bottle The Original Spa Solution and add to the water. pH will automatically lock-in.
After Each Use	<ul style="list-style-type: none"> • Add one teaspoon Shock and let sit with jets on and cover off for 20 minutes. Spa will be ready for next use.
Weekly	<ul style="list-style-type: none"> • Check water weekly and adjust chemicals if needed. Add 1stp of chlorine as needed.
Every Month	<ul style="list-style-type: none"> • Remove filter cartridge(s) and clean by soaking overnight in a pail of water with 100ml of Filter Soak (It is suggested that you have replacement cartidge(s) available to eliminate down time). • Rinse the filter cartridge(s) with a strong water spray.
Every 3 Months	<ul style="list-style-type: none"> • We recommend draining and refilling the tub every three months and repeat start-up procedure. • If draining is not possible, firmly shake one 480ml bottle of The Original Spa Solution® and add to the water to regenerate the enzymes. • Half drain for stabilizer/water test and rapid purge.
Annually	<ul style="list-style-type: none"> • Add one 480ml bottle of Spa Surge (to clean your plumbing lines & spa jets) and let circulate for 24 hours. • Drain and refill the tub (we suggest you use a carbon Pre-Filter on your garden hose). • Repeat the tub start-up procedure as described as above.
Every 3 Months	<ul style="list-style-type: none"> • Prepare hot tub for draining by removing and soaking filter cartridges in a cartridge cleaner solution or purchase new filters • Add 250mL of Whirlpool Rinse and run the jets for 2 hours. Drain and refill the hot tub • Replace Nature2 Clarifier Spa Stick

IDEAL SPA WATER RANGES

Alkalinity	80 - 120 ppm
Calcium Hardness	150 -250 ppm
pH	The Original Spa Solution will automatically lock-in pH (Check 7.2 - 7.8)
Sanitizer	Add sanitizer as specified above (we recommend a granular Di-Chlor product as a sanitizer)

Please Note:

The Original Spa Solution is an all natural, non-toxic enzyme formula that will give you clean, clear water for up to 90 days with each application. It is an environmentally friendly product that will perform as promised when used as instructed. **Be sure to shake product well before applying.**

The Original Spa Solution is an ideal product for spa owners that have dermal sensitivity to harsh chemicals and are looking for a simple spa water maintenance program. **Be sure to allow 20 minutes for the sanitizer to perform its work and dissipate before getting into the spa or closing the cover.**

TIMING	WHAT TO DO
Used Spa Preparation	<ul style="list-style-type: none"> Shake well and add one 480ml bottle of Spa Purge to existing water. Let circulate for 5 days at 100 degree F. to clean pipes and jets. Drain spa and rinse sides clean.
Start-Up	<ul style="list-style-type: none"> Fill new tub with source water (we recommend a carbon Pre-Filter on your garden hose). Adjust Alkalinity and Hardness to ideal levels. Bring water to temperature of 100 Degrees F. Add one teaspoon of granular chlorine and operate with jets on and cover off for 20 minutes.
